Arrest rate	5.61	2.42	8.70	3.19	1.23	0.00	1.45

**Notes:** Population figures are 2005 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

**Disparity index** = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

**Search rate** = (searches / stops) X 100.

**Contraband hit rate** = (searches with contraband found / total searches) X 100.

**Arrest rate** = (arrests / stops) X 100.

#Error indicates zero denominator.

## Agency response

Two important system changes occurred in 2005. This year was the first year that all vehicle stops were required to be reported. Previously, only stops for traffic violations were reported. The new category of Investigative Stops made up 11.23% (6,073) of the 2005 total. Additionally, electronic reporting replaced Scantron reporting this year. The persons stopped in vehicles were searched by police 6.6% of the time (3,586 to 54,063). Much of the search to stop ratio may be explained by the fact that Investigative Stops are now included in the report. This category of stop includes suspicious vehicle checks and wanted vehicle stops. In 1,900 of the 3,586 cases, the driver had an outstanding arrest warrant that requires a custodial search. There were 1,586 African-American and 298 white arrests made for arrests warrants following a vehicle stop. The remaining 16 arrests were of other races/ethnicities. There were 1597 stops where a search was conducted on a white or African-American. Of that number, 1001 (62.7%) were African-American and 596 (37.3%) were white. The disparity was a result of 405 more searches of African-Americans.
